

The ELM Digital Asset Vault

What is the ELM Digital Asset Vault?

In today's digital age, our lives are closely connected to various digital assets that have significant sentimental, personal, and financial value. At ELM Legal Services, we understand the importance of protecting these digital assets as part of your Estate Plan. That's why we've created the ELM Digital Asset Vault, a modern solution to ensure that your digital wealth and memories are kept safe and preserved for future generations.

The ELM Digital Vault is a purpose-built cloud storage solution that automatically distributes your digital items to your intended recipients. You can store memorable photos, account passwords and meaningful documents so your loved ones can easily access the devices and accounts you want when you are no longer around.

For more information on digital Estate Planning, please visit www.elm-online.co.uk/digital-estate-planning-a-comprehensive-guide/

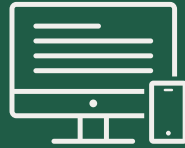

While our vault can secure and distribute your digital assets, you still need a Last Will & Testament to distribute your physical assets.

What are the benefits of using our digital vault?

- **Comprehensive Asset Management:** Ensure that all your digital assets are accounted for and properly integrated into your Estate Plan, preventing any oversight or confusion during the distribution process.
- **Efficient Asset Transfer:** Streamline the process of transferring your digital assets to your chosen Beneficiaries, minimising delays and potential complications that could arise from lack of access or unclear ownership.
- **Reduced Family Burden:** Your loved ones won't have to navigate the complexities of your digital estate on their own and will have clear instructions on how to access and manage your assets, reducing stress during an already challenging time.
- **Security:** Robust security measures protect your digital assets from unauthorised access, cyber threats, and data loss, ensuring that your assets are preserved and accessible to your Beneficiaries as intended.
- **Digital Legacy:** Storing your digital assets with the ELM Digital Asset Vault can help you leave behind a well-organised digital legacy, allowing your family to access and cherish your digital possessions and memories.

What can you store in the vault?

Login details and passwords: Ensure your loved ones can access your online accounts and electronic devices.

Important documents: Make sure your intended recipients can automatically access important digital documents.

Photos and videos: Store thousands of cherished memories and share them with those closest to you with ease.

Estate planning documents: View up-to-date copies of any documents we have prepared for you within the vault.

Care instructions: Leave behind clear instructions for those caring for your children, pets and businesses.

Digital currencies: Safeguard login details and access tokens allowing access to your cryptocurrencies, wallets and digital art.

How do your assets get delivered to your recipients at the right time?

Our vault uses a strict process to ensure we don't release your digital assets incorrectly.

1

Notification: One of your chosen digital Executors notifies us of your passing using the vault app.

2

Verification: After being notified, we attempt to contact you to check the claim. If we are unable to reach you, we contact your digital Executors to confirm your passing with a death certificate.

3

Distribution: Once we have confirmation, your digital items are released to your intended recipients.

Pricing (all prices include VAT as standard)

Our digital asset vault is included in the following packages:

- Storage & Updates
